

How do we classify the diets of animals?

Science

Miss Roberts

TASK

1. Name three examples of organisms that are herbivores
 - a. _____
 - b. _____
 - c. _____
2. Why do some herbivores have a special digestive system?
3. Why are carnivores sometimes called “meat eaters”?
4. Is a snake a vertebrate or an invertebrate?

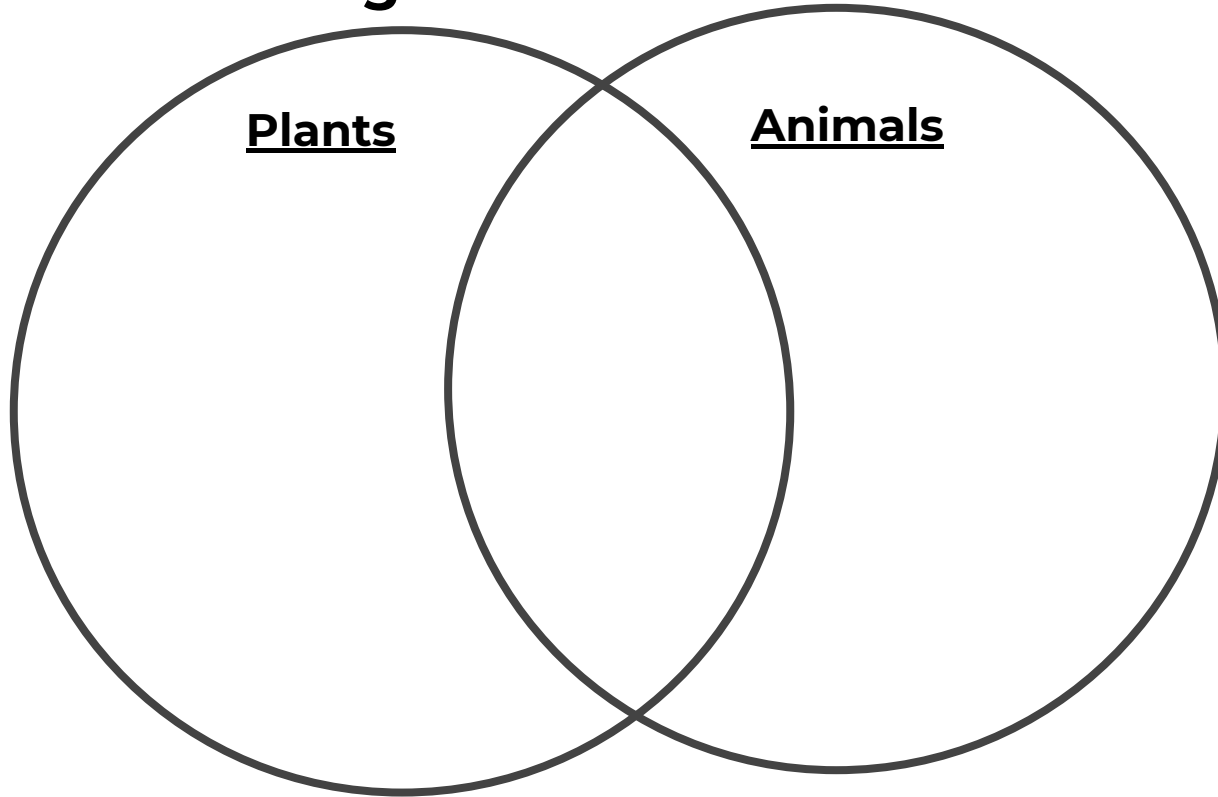

Draw this table

Animal	Carnivore	Herbivore	Omnivore
Human			
Spider			
Rabbit			
Bear			

Draw this Venn diagram

Place these organisms in your Venn diagram

Organism	Bear	Robin	Goat	Leopard
Diet	<ul style="list-style-type: none">• Berries and nuts• Insects	<ul style="list-style-type: none">• Berries• Worms	<ul style="list-style-type: none">• Grass• Flowers	<ul style="list-style-type: none">• Monkeys• Antelope
Organism	Squirrel	Giraffe	Snail	Eagle
Diet	<ul style="list-style-type: none">• Fruits and nuts• Insects	<ul style="list-style-type: none">• Leaves	<ul style="list-style-type: none">• Fruits• Leaves	<ul style="list-style-type: none">• Birds• Snakes
