Animal Habitats

LC: Can I explain what habitat and adaptation mean?

Mar 7-09:31

Living	Not living	Never alive

Jan 21-12:04

Today we will be learning about...

- *What is a habitat?
- *Which animals live in different habitats?
- *How are animals suited to where they live?

Jan 21-12:02

What is a habitat?

Feb 18-11:05

Let's take some ideas...

Mar 7-09:37

A habitat is the home of an animal or plant!

Nearly every single place on Earth is a habitat for a plant or animal- from the hottest desert to the coldest ice cap.

Nov 13-10:32

Animal's habitats

An animal's habitat will provide food and shelter for the animal.

Nov 13-10:33

Do all animals live in the same habitat?

Why not?

Feb 18-11:32

Would a fish live in a desert?

Why not?

Where might it live?

Feb 18-11:45

Would a lion live in the Antarctic?

Why not?

Where might it live?

Feb 18-11:45

Task 1:

Each table has been given a different habitat.

Use post it notes to-

Write down animals that might live in the habitat. Can you write down WHY any animals might live in that habitat?

Feb 18-11:43

<https://www.youtube.com/watch?v=-CoApUAZFf8>

(A nice video if you'd like another one!)

Feb 18-13:21

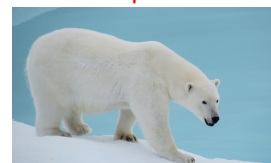

What is adaptation?

Adaptation means changing something in order to survive in an environment.

Nov 13-10:49

TASK:

How are polar bears adapted to where they live?

Feb 18-13:41

Plenary

What is a habitat?

Name some animals and their habitats.

What word means animals are suited to their habitat?

Jan 21-20:47

Habitat

Polar Bears live in the Arctic. It is very cold and icy and is right at the top of the world.

Adaptation

The Polar Bear has fluffy fur and a thick layer of blubber to keep it warm in the freezing weather. They also have sharp claws to help them hunt and catch their food.
