

## Art

### Making multi-patterned art.

Using a ruler divide your piece of paper into sections. You can divide it into small and large pieces. You can make various shapes- such as triangles, rectangles, squares or all of them.

Using different designs complete all of your shapes, you can use pencils, felt tips or whatever you have at home. For example- one shape could be coloured in using zigzags, hearts, dots etc.

You can fill each shape using shading techniques or patterns. The choice is yours!
