

Five in 5

21.01.21

Problem of the day

Millie says, "When you halve any number that ends in 8 the answer always ends in a 4."

1. $? = 7 \times 4$

2. $2959 + 100$

Is Millie correct? Circle YES or NO.

3. $72 \div 9$

YES

NO

4. $4 \times 2 \times 3$

5. $8120 - 869$
