

12.2.21.

Measurement.

LO: To recognise that a litre is a standard unit of measure.

Task: Ask your grown up to help you find some empty containers, this could be a plastic bottle, a jug or a cup & a container which holds approximately 1litre of liquid. Using that container, estimate if you can fill the other containers using just 1litre of liquid or if you will need more than 1 litre.

Object	Estimate (1 litre or more?)	How many litres? (approximately)
Waterbottle	1 litre	2 litres.
